

PRODUCT NO. 352935

ZenXtreme™ Low Gloss Tire Dressing

An advanced, professional-grade, ready-to-use low gloss tire dressing that delivers a clean, rich, like-new appearance with a refined low luster satin finish. The ready-to-use, solvent-based silicone-enhanced formula penetrates and bonds to the tire surface for long-lasting performance, minimized sling, strong water resistance, and a hydrophobic barrier that helps repel dirt and road grime. Designed for both car enthusiasts and professional detailers, it restores deep, dark color while helping protect against fading and browning. The result is a well-maintained, OEM-inspired look that stays cleaner longer and complements a properly detailed vehicle.

DIRECTIONS FOR USE

1. Thoroughly clean tire with an appropriate tire cleaner and brush to remove dirt, old dressings and browning. Rinse well and allow tires to dry completely
2. Apply a small amount of dressing to a foam or microfiber applicator. Spread evenly over the tire sidewall using a thin, uniform coat
3. Product may also be applied directly to tire surface. Evenly spray a small amount of dressing directly to the tire surface, ensuring limited overspray
4. Wipe or level any excess product to ensure an even finish and to prevent sling
5. Allow product to cure on tire surface for 10-20 minutes. Do not move vehicle as excess will sling onto other vehicle surfaces and surrounding environment
6. Reapply additional coats for slightly richer appearance or renewed protection

PRO TIPS

- Use sparingly – a thin coat delivers the best performance and finish
- Avoid application on hot tires or in direct sunlight
- Do not apply to tire tread
- Store tightly sealed in a cool, dry place
- DO NOT APPLY TO ENGINES, BRAKE OR ACCELERATOR PEDALS, SEAT BOTTOMS, STEERING WHEEL, GLASS OR PLASTIC SURFACES

FEATURES & BENEFITS

- Low gloss/satin finish
- Excellent bonding and durability with minimized sling
- Deep, even color and strong water beading
- Guards against UV damage, fading and browning
- Suitable for enthusiasts and professional detailers

PHYSICAL CHARACTERISTICS

PHYSICAL FORM	Liquid
