## PENETRATING LUBRICANT WITH PTFE

This PTFE lubricant is a high-tech formulation of specific oils blended with micron-sized PTFE to provide exceptional, long-lasting penetration and lubrication. It significantly decreases friction and distributes a wear-resistant film that lubricates moving parts. The powerful foaming action creeps into tight spaces, penetrates rapidly to loosen frozen parts from rust, and guards application surfaces from corrosion in extreme temperatures. This penetrating lubricant is ideal for various applications, ensuring optimal performance and protection.

### FEATURES & BENEFITS

- For use on any surface that glides, slides, rolls, twists, or moves
- Penetrates to loosen frozen parts due to rust, wear, or heavy grease build-up
- Defends against corrosion and rust (ASTM D1748 Compliant)
- Effective across a broad range of temperatures

### APPLICATIONS & USES

ZenaTuff is exceptional for use on vehicles, industrial machines, motors, shop equipment, large machinery, nuts and bolts, hinges, roller bearings, conveyors or pulleys, electric motors, gears, and other sliding or turning parts. You will find a need for ZenaTuff in automotive repair shops, airport terminals, motorcycle dealers, machine shops, machinery manufacturers, trucking companies, metal fabricating shops, tool and die shops, and much more.

### DIRECTIONS FOR USE

1. Shake well before using.
2. Spray liberally on frozen or corroded part.
3. Let stand for several minutes to allow thorough penetration.
4. Reapply for long-lasting protection.
