# A COMMITMENT TOWARD SAFETY

## Translucent Heavy Duty Container

- Translucent container makes chemical inventory a snap!
- Unique polymer tank combines strength, stability, and longevity.
- Gallon gauge stamped into container for easy product level readings.

## Laminated Chemical Resistant Label

- Avoid label damage and peeling with a laminated label.
- Torn or unreadable label problems will be a headache of the past.
- Labels follow SDS guidelines and stringent formats.

## Laminated Reorder Point Indicator

- Chemical resistant label notes the reorder point and weekly delivery day to simplify product reorder.

## Industrial Locking Ball Valve

- Enjoy the safety and ease-of-use with a gravity fed ball valve system. Control product access with a LOCKING dispensing system.
- Avoid broken and messy hand pumps which are expensive and dangerous.

## Chemical Resistant Transfer Hose

- Transparent hose allows user to see product as it flows.
- Product can be poured directly into transfer containers or equipment.

## Forklift-Ready Industrial Metal Stand

- Engineered for reliable weight support and stability.
- Industrial framing allows for easy forklift movement.

## Ball Valve Guard Protection

- Horizontal and vertical guards protect ball valve for added safety.

*Refill ... Not Landfill.*

# TURN AWAY FROM YOUR PAST ...

## Eliminate Drum Disposal

- With increasing governmental demands, it is becoming difficult to dispose of 55 gallon drums.
- Our free of charge container eliminates this problem.
- Avoid exposure to liability associated with drum accumulation and drum disposal.

## Increase Employee Safety

- With our refillable container, your employees do not risk injury moving 55 gallon drums.
- Our gravity fed ball valve insures easy, safe dispensing of product.
- All products are biodegradable and come with approved Safety Data Sheets.

## Reduce Material and Labor Costs

- We locally manufacture and deliver directly to you.
- Eliminate the expenses related to drum pumps, drum handling and barrel disposal.
- Pay only for product, never the hidden cost of drums.
- *Delivery is free!*

## Simplify Inventory and Save Space

- Our no-cost translucent containers clearly verify the amount of product on hand.
- A 165 gallon Chemsafe container uses nearly 1/3 less floor space than three 55 gallon drums.

## National Network of Manufacturers

- Our national network of manufacturers enables us to produce formulas unsurpassed in performance and consistency.
- Each of our computerized manufacturing operations can tailor-make products and service our customers in multiple locations.

## **SPECIALTY FORMULAS:**

*Large enough to design products and offer technical service specific to your operation. Small enough to serve. Your satisfaction guaranteed.*

**CHEMSAFEINT.COM • 1-800-989-1177**

# **CHEMSAFE**

**INTERNATIONAL**

## ... IT'S THIS SIMPLE!

**STEP 1:** Your Chemsafe technical representative makes an on-site visit to identify your specific industrial chemical needs and develops a product request profile.

**STEP 2:** Your Chemsafe in-house Chemist reviews your request profile and makes a product specific recommendation. This may be chosen from thousands of existing formulas or we can engineer an innovative solution just for you.

**STEP 3:** Your Chemsafe technical representative brings product samples, Safety Data Sheets (SDS), Technical Data Sheets (TDS), and product prices for an on-site test at **NO CHARGE**. Once a test formula meets your needs, we decide on a container size based upon your usage and available space.

**FINALLY**, our fleet will come and deliver your **FREE of CHARGE** container, placing it at your desired location. Your product will be filled and accurately measured via our metered pump. As your product reaches its refill point, our vehicles will return and top off your container.

### CONGRATULATIONS!

On your new environmentally friendly, employee safe and biodegradable chemical program.
